

Lohitha Sai Priya Ratakonda

(+1) 419-494-4565 | lohitharatakonda.179@gmail.com | [LinkedIn](#) | [Portfolio](#) | Bowling Green, OH (Open to Relocation)

PROFESSIONAL SUMMARY

MS Computer Science graduate (BGSU, GPA 3.87/4.0) with hands-on experience in full-stack development, AI/ML systems, and cloud-native applications. Skilled in Python, Java, React, Spring Boot and MySQL with project experience in fraud detection, medical image AI, gesture recognition, and conversational AI. AWS, GCP, and Azure certified. Published researcher in deep learning with an upcoming Edge AI publication. Known for a proactive learning approach and commitment to developing efficient, secure and user-focused software solutions. Eager to apply technical expertise in Software Engineering and/or AI/ML roles to deliver impactful and scalable results.

EDUCATION

Master of Science in Computer Science: 3.87/4.0 Aug 2024 - May 2026

Bowling Green State University (BGSU), OH, USA

Coursework: AI for Software Engineering, Secure Software Engineering, Computer Systems Security, Research Methods in CS, Data Science Programming, Techniques of Simulation, Database Management Systems, Design and Analysis of Algorithms, Directed Research - Edge AI & Digital Twin

TECHNICAL SKILLS

Programming	: Python, Java, JavaScript, TypeScript, SQL, C, C++, R, Bash
Web and Frameworks	: React.js, Redux, HTML5, CSS3, Spring Boot, FastAPI, Node.js, REST APIs, Microservices
Databases and Cloud	: PostgreSQL, MySQL, Oracle SQL, MongoDB, DynamoDB, AWS (Certified), GCP (Certified), Azure AZ-900 (Certified), Docker, Kubernetes
AI and Libraries	: PyTorch, TensorFlow, Scikit-learn, XGBoost, CNN, GNN, Transfer Learning, NLP, OpenCV, LangChain, RAG's
Platforms and Tools	: Git, Jenkins, QuickBase, Java AWT, VS Code, Linux, Windows, Agile, CI/CD
Other Concepts	: OOP, Distributed Systems, Software Testing, Design Patterns, MLOps, Federated Learning, Edge AI, Deep Learning

EXPERIENCE

Software Engineering Intern, Senecio Corporation, Bowling Green, OH Sep 2025 - Dec 2025

- Contributed to building a community mobile app using JavaScript, Java, and SQL - lets users discover local events, post listings, sell items, and connect with nearby people within a set mile radius
- Built in-app voting and rating system for restaurants and community events; designed database schemas, REST APIs, and frontend components across full stack
- Used AI tools to assist with code generation, debugging, and feature ideation throughout the development process

Graduate Teaching Assistant, Bowling Green State University, Bowling Green, OH Aug 2024 - May 2026

- Taught and assisted students in 5 courses: Network Architecture & Applications, Operating Systems, Computer Organization, Understanding Computers, and Python Programming
- Held office hours helping 50+ students through complex concepts; graded assignments, projects, and exams with structured feedback

Software Engineering Intern, C-DOT - Govt. of India Telecom R&D, Bengaluru, India Jul 2023 - Sep 2023

- Developed data path management software for an Open Wi-Fi Access Controller under India's 5G/6G telecom R&D lab; built MySQL database, user authentication GUI, and REST APIs for Access Point management
- Implemented VLAN bridge configuration; studied Wi-Fi protocols 802.11a/b/g/n/ac/ax and WPA security methods; presented live demo to WAC team

KEY PROJECTS

AI-Powered Fraud Detection & Virtual Wallet | Python, Machine Learning, Deep Learning, XGBoost, SQL, REST APIs

- Real-time fraud detection engine analyzing spending patterns using XGBoost ensemble classifiers; built virtual wallet platform with spending analytics and anomaly detection achieving 94%+ precision

Website Payment Fraud Detection | Python, Scikit-learn, Machine Learning, Deep Learning, SQL

- End-to-end payment fraud detection analyzing transaction metadata and behavioral signals with high precision real-time scoring

DATAR - Android App Success Prediction | Python, SQL, XGBoost, Random Forest, Pandas, Seaborn

- Analyzed 7,800+ releases from 1,300+ apps using SQL and EDA; ML models achieving 83.7% accuracy identifying key success predictors through feature importance analysis

Pneumonia Detection from Chest X-Rays | Python, TensorFlow, CNN, VGG16, Transfer Learning, Keras

- CNN + VGG16 system achieving 92% accuracy on 5,800+ X-ray images using transfer learning and data augmentation - Published in IJRAR 2024

GNN - Large-Scale Graph Classification (4M+ nodes) | Python, PyTorch, GCN, GIN, ArangoDB

- 97.37% accuracy on 4M+ node knowledge graph datasets; distributed graph traversal and subgraph mining across 3M+ edges

AI Telegram Chatbot | Python, NLP, LangChain, FAISS, Telegram Bot API, Django

- Built from scratch with intent classification, multi-turn conversations, and FAISS-based PDF document retrieval using LangChain

AI Job Portal Management System | Java, Python, QuickBase, NLP, SQL, Machine Learning

- AI-integrated job portal on QuickBase with ML-powered job matching, candidate recommendations, and automated screening workflows

Supermarket Billing & Inventory System | Java, AWT, OOP, MySQL, SQL

- Desktop billing system using Java AWT with real-time inventory tracking, automated billing, discount logic, and receipt generation

HONORS & AWARDS

- Mrs. Joy Appenteng Award (\$500)** - Best academic performance among all international students, MS CS, BGSU 2025-2026
- Graduate Merit Scholarship** - Full tuition fee waiver for MS Computer Science at BGSU based on exceptional academic GPA
- Cash Prize** - Awarded for achieving 9.47/10.0 GPA in Bachelor of Engineering, RMK College of Engineering
